

SURF
Table
By Maximilian Schmah

PRODUCT INFORMATION

Surf – a mobile table for Offecct designed by Maximilian Schmahl. Berlin based Maximilian is one of the new designer in Offecct's design team 2018. In his capacity as an acclaimed contemporary designer, trying to reinvent the wheel is not in Maximilian Schmahl's nature. But wheels have in any event once again become a key element under furniture in activity-based venues.

– Of course, the development has to do with the fact that we now work practically anywhere. And practically anyway, highlights Maximilian Schmahl.

If nothing else, both the Swedish and German word for "furniture" comes from the Latin "mobilis" – which designates something that is moved around.

Surf is moved around easily, yet it is no "furniture" according to the designer, rather "a tool for achieving maximum flexibility in activity-based venues", whether there is a computer or a couple of cups of coffee sitting on top of it. The light table blends well into Offecct's Lifecircle philosophy.

Surf has a table top in lacquered ash and handle in white-pigmented solid ash, metal frame and black castors.
